      <h3>Project 1</h3>
      <p>A Power BI project is typically a data visualization and business
intelligence initiative centered around the Microsoft Power BI platform.
It involves gathering, cleaning, and transforming data from various
sources, such as databases, spreadsheets, or cloud services, and then
creating interactive reports, dashboards, and visualizations to derive
insights and support decision-making processes.</p>

      <h3>Project 2</h3>
      <p>Title: Sentiment Analysis of Airbnb Reviews</p>

      <p> Description: This project aims to analyze sentiments expressed
in Airbnb reviews.
```

```
        Through natural language processing techniques, the sentiment of
reviews will be classified as positive, negative, or neutral.
        The dataset will be collected from Airbnb listings, preprocessed
to remove noise, and then analyzed using machine learning or deep learning
models.
         Visualizations will illustrate sentiment trends over time and
across locations, aiding hosts in improving listings and enhancing the
user experience.</p>
